

Myanmar Koei International is actively looking for a Design Engineer (Water Supply/ Sewerage/ Drainage) to join our dynamic engineering department. This role involves collaborating closely with our infrastructure team.

Job Title: **Design Engineer (Water Supply/Sewerage/Drainage)**

### **Job Descriptions**

- Designing initial outlines and complete plans for sewerage, water treatment, drainage structures, and other water-related structures.
- Review the existing or related water-related design.
- Prepare design drawings and design reports.
- Support in creating BOQ of the designed items.
- Japanese design standards and materials specifications shall be applied.

### **Job Requirements:**

- A Minimum Bachelor's Degree in Civil Engineering.
- Previous work experience is strongly preferred.
- Must be confident using various design software for water supply/sewerage/drainage systems (SWMM, EPANET, PDP, etc.).
- Design based on plans, profiles, and sections created by surveys.
- Make drawings of water and sewage pipes using CAD and calculate quantities using the spreadsheet.
- Strong attention to detail and accuracy.
- Ability to multitask and work under pressure.
- Relevant certifications or professional memberships are preferable.

Deadline of application: **21 November 2024**

Joining date: As soon as possible
